340	Beautiful Nuthatch	<i>Sitta formosa</i>	04/02/2003	Jim argued for a 5 for this sighting. We observed them through the scope as three foraged in the epiphytes on a large tree. 391	White-spectacled Warbler	<i>Seicercus affinis</i>	04/08/2003	Half bird. Jim saw one on a rest stop missed by the rest of the group. This is hard to separate from Grey-cheeked Warbler. 392	Wedge-billed Wren-Babbler	<i>Sphenocichla humei</i>	04/08/2003	An unbelievable look at one of the "least lovely" birds in the world, as well as one of the rarest. This bird was known from only six specimens until it was rediscovered in Bhutan in 2001. We had tried taping it out without success when David heard a bird he didn't recognize. After recording the song and trying to lure the bird out, we were prepared to leave when Dion suggested trying the Wren-babbler tape given to him by another guide.
